Do some simple app with Node.js and upload it inside .zip or .rar file with some explanation about every thing you did write it inside that app

Use this code as a hint:

```
(async () => {
  const express = require("express");
  const app = express();

  const port = 3000;

  app.use(express.json());
  app.use(cors());

  app.post("/forex/scan", async (req, res) => {
    const url = "https://scanner.tradingview.com/forex/scan";
    const headers = {
      "Content-Type": "application/json",
    };
    const body = JSON.stringify(req.body);
    const response = await fetch(url, { method: "POST", headers, body });
    const json = await response.json();
    res.json(json);
  });

  app.listen(port, () => {
    console.log(`Server listening at http://localhost:${port}`);
  });
})();
```
